Material Library(Angular & REACT)

EXPERIENCE

Associate Software Engineer

eNtrust Software and Solutions

📅 2023 - Present   📍 DLF Cyber City, Chennai

As an Associate Software Engineer at eNtrust Software and Solutions, I have had the opportunity to engage with a diverse array of frameworks tailored to specific company requirements. My responsibilities included:

- Utilizing various frameworks as needed by the company.
- Developing the front end of the Report Manager Application using the React Framework.
- Contributing to the migration team for the company's core application, REmaap, and developing modules within it using Angular.
- Developing REST APIs using the ASP.NET CORE framework.
- Designing complex MySQL database table architectures.

ACHIEVEMETNS

👍 **Rapid Learning**

As a newcomer, I eagerly embraced new technologies such as React and the MUI Library, culminating in the development of a cutting-edge web application. These efforts garnered recognition from senior leadership within the company.

👍 **Quality Deliveries**

Despite handling fewer scoped projects as a junior developer, I prioritized meticulous documentation and rigorous testing over development efforts. This focus on quality resulted in consistently high-quality deliverables. Acknowledgment from my manager in team meetings underscored my commitment to excellence.
