OBJECTIVE

Enthusiastic Full Stack Developer passionate about building scalable, user-centric web applications. Skilled in adopting cutting-edge technologies to deliver innovative solutions and exceed project goals.

EXPERIENCE

Associate Software Engineer

eNtrust Software and Solutions

01/2023 - Present DLF Cyber City, Chennai

As an Associate Software Engineer at eNtrust Software and Solutions, I have had the opportunity to work with a diverse range of frameworks tailored to the company's specific requirements. My responsibilities included:

- Developing the front end of the Report Manager Application using the React Framework.
- Contributed to the **migration of the REmaap core application** by designing and implementing Angular-based modules.
- Designed and optimized **REST APIs** with ASP.NET Core to enhance backend efficiency.
- Successfully trained and mentored two interns, equipping them with skills in Angular, .NET Core and development processes, contributing to the team's productivity.

ACHIEVEMENTS

Rapid Learning

As a newcomer, I quickly adapted to new technologies, including the React library and Angular framework, and successfully developed a cutting-edge web application. This achievement earned recognition from senior leadership and led to an opportunity to contribute to the company's primary SaaS application, REmaap.

UI Designing and Development

Leveraged opportunities to design and develop key modules for the REmaap application. Gained proficiency in design tools like Figma, effectively bridging the gap between design and development to deliver user-friendly and visually appealing interfaces.

Quality Deliveries

Despite handling fewer scoped modules as a junior developer, I prioritized meticulous documentation and rigorous testing over development efforts. This focus on quality resulted in consistently high-quality deliverables. Acknowledgment from my manager in team meetings underscored my commitment to excellence.

Microsoft MFA implementation

Conducted in-depth research on Microsoft's MFA technology and gained expertise in Microsoft Azure AD. Successfully implemented Multi-Factor Authentication (MFA) in the REmaap application, enhancing its security features. Received client recognition for these impactful enhancements.

Leadership & Mentorship

Provided training and mentorship to two interns, fostering their growth in frontend development technologies and ensuring alignment with project goals.

EDUCATION

Higher Secondary School

Chennai Boys Higher Secondary School

2017 - 2018

GPA

6.8 / 10

Bachelor of Engineering - Computer Science

Anna University - Chennai

2018 - 2022

GPA

8.1 / 10

SKILLS

HTML5, CSS3

Angular Framework

BOOTSTRAP

Jest

ASP.NET CORE WEB API

MYSQL

SOFT SKILLS

Adaptability

Swiftly adjust to changing circumstances, ensuring seamless transitions and optimal performance across diverse projects and environments.

Problem-solving

Proactively tackle challenges by analyzing situations, identifying root causes, and implementing effective solutions to drive success.

Creativity

Innovatively approach tasks, generating unique solutions and fostering fresh perspectives to inspire innovation and drive success.

Leadership

Demonstrated leadership by mentoring and training interns, fostering collaboration, and driving team success through clear communication and guidance.
